PROFILE

Computer Science undergraduate and Backend Developer focused on Java and Spring Boot. Strong foundation in core Java and OOP, with hands-on experience building secure and scalable REST APIs. Skilled in Spring Security (JWT, OAuth2), JPA/Hibernate, and backend best practices. Familiar with Docker and AWS, and passionate about building production-ready applications.

EDUCATION

10/2022 – 07/2026 **B.Sc. in Computer Science**
Faculty of Computer and Information Menofia University

EXPERIENCE

Contestant

ECPC (Egyptian Collegiate Programming Contest)

Jul - 2024

Bootcamp – Core Java with

Mosh Hamedani

Oct 2024 - Mar 2025

- Completed an intensive self-study bootcamp covering **Core Java** using Mosh Hamedani's materials.
- Covered essential topics such as **OOP, Exception Handling, Generics, Collections, Lambda Expressions, Streams, and Multithreading**.
- Applied concepts through hands-on exercises and real-world coding challenges.

Data Analysis Training NTI – National Telecommunication Institute

120 Hours (90 Technical + 30 Freelancing)

- Python, Excel, Power BI for data analysis & visualization
- Freelancing skills: proposal writing & client communication
- Applied analytics on real datasets in team-based projects

PROJECTS

EduNest — Online Mentorship & Learning Platform

Graduation Project (In Development)

web-based **mentorship platform** connecting students with mentors for structured learning. It features **real-time chat, live video sessions, quizzes, task management, and certificate generation**.

Built using Java 21 and **Spring Boot** with **Spring Security** and JWT for secure **role-based access**. Utilizes **Spring Data JPA** with **MySQL**, **WebSocket** for **real-time communication**, and **Jitsi** for **video sessions**.

Follows a **clean layered architecture** with best practices like DTO pattern, validation, and exception handling. Containerized using Docker and designed for scalable, production-ready deployment.

Sab3 Bank System

Sab3 Islamic Bank System (Spring Boot) (RESTful APIs, Spring Security, JPA)

Developed a **secure RESTful banking API** using **Spring Boot** and Java 21, handling account management and transactions.

Implemented **JWT-based authentication** with **Spring Security**, integrated **MySQL** using **Spring Data JPA**, and added features like **email notifications and PDF statements**.

Documented APIs using Swagger for easy testing and integration.

SKILLS

Programming Languages

Java, C++, Python

Back-End

Spring Core, Spring Data, Spring Boot, Spring AOP, Spring Security, Spring MVC, Spring Cloud REST APIs

Java

JavaSE , JavaEE , Collection, Streams, Multithreading

Database

MySQL, PostgreSQL, MongoDB, ORM, Hibernate, JPA

Core Concepts

OOP, Design Patterns, SOLID Principles, Data Structures, Algorithms

COURSES

Java Backend Development with Spring Boot [🔗](#)

Built REST APIs using Spring Boot with layered architecture, Worked with Spring Data JPA (relationships, custom queries), Applied validation, exception handling, logging & API documentation, Implemented transactions, caching, and performance optimization, Used Docker and deployed applications on AWS, Applied monitoring using Spring Boot Actuator

Spring Security Zero to Master [🔗](#)

Implemented authentication & authorization using Spring Security

Worked with JWT, OAuth2, and OpenID Connect, Applied security concepts: CSRF, CORS, password encoding & hashing, Built role-based access control and method-level security, Developed custom filters and secure REST APIs, Integrated Keycloak & Authorization Server for advanced security
